Nutrition and Personalized Meal

The Nutrition Crisis

Diets don't fail because people are lazy.
They fail because they're generic.

Scale of the Obese Problem

Nutrition Crisis in Numbers

$ 280 billion

People spend $280 billion on diets annually, with a 95% failure rate.

86 million+

86 million consumers are searching for a solution that actually works.

$ 250/hours

Professional nutritionists cost around $250 per session or hour.

242,000

74% of adults globally are overweight and have a serious case of obesity.

Problem Statement

Rapid User Acquisition

High User Satisfaction

Dual Monetization

Revenue Generation

User Goals

Effortless Meal Prep from Available Pantry Items

Instant Calorie & Nutrient Tracking via Camera

Strict Budget-Constrained Healthy Eating

Access to Professional Nutrition Guidance

Our Solution

AI Trained on Clinical Nutrition Data

Hyper-Personalized to Your Biology

An App Designed Just for You

Premium outcome-driven subscription

Our AI transforms food data into personalized nutritional insights based on each user's goals and eating patterns.

01 **Onboarding Intelligence**

02 **AI Customize Engine**

03 **Wearable Device Sync**

04 **Continuous Learning**

How Our AI Technology Works

Input

The user uploads a food image or provides information about their meal and nutrition goals

AI Analysis

Our AI analyzes the input to identify the food and understand its nutritional characteristics.

Smart Recommendations

AI generates personalized insights and recommendations to help users make healthier food choices.

Key App Features that Built for You

Feature 1 - Smart Meal Planning
Plan daily meals based on your nutrition goals

Feature 2 - AI Food Scanner
Identify meals and get instant nutritional insights

Feature 3 - Dietitian Hub
Connect with certified dietitians and manage consultations

Feature 4 - Personalized Nutrition Goals
Set calorie, weight, activity, and dietary preferences

The Available Market Size

The Health - Market is Exploding

The health and wellness market is growing rapidly as people become more focused on nutrition and preventive care. AI and digital health solutions are creating new opportunities for personalized and accessible guidance. This growing demand positions PureBite to help users make smarter, healthier choices every day.

Total Addressable Market (TAM) **$ 7.8B**

Service Addressable Market (SAM) **$ 4.8B**

Service Obtainable Market (SOM) **$ 80M**

Our Various Business Model

Multiple Revenue Streams. Built to Scale

PureBite combines multiple revenue streams to create a sustainable and scalable business model. By serving users, dietitians, and health-related businesses, the platform can grow while expanding its reach and impact.

Premium Subscription

Users can access advanced AI features and personalized nutrition plans through a premium subscription.

Dietitian Services

Users can connect with professional dietitians and book personalized consultations through the platform.

Data-Driven Insights

Provide valuable, privacy-conscious insights that can support businesses in understanding nutrition and wellness trends.

Affiliate & Product Recommendations

Recommend relevant healthy meal and services while generating revenue

UI/UX Design

Design Process & User Experience

01 — User Research

Understanding users' needs, behaviors, goals, and pain points.

02 — User Flow

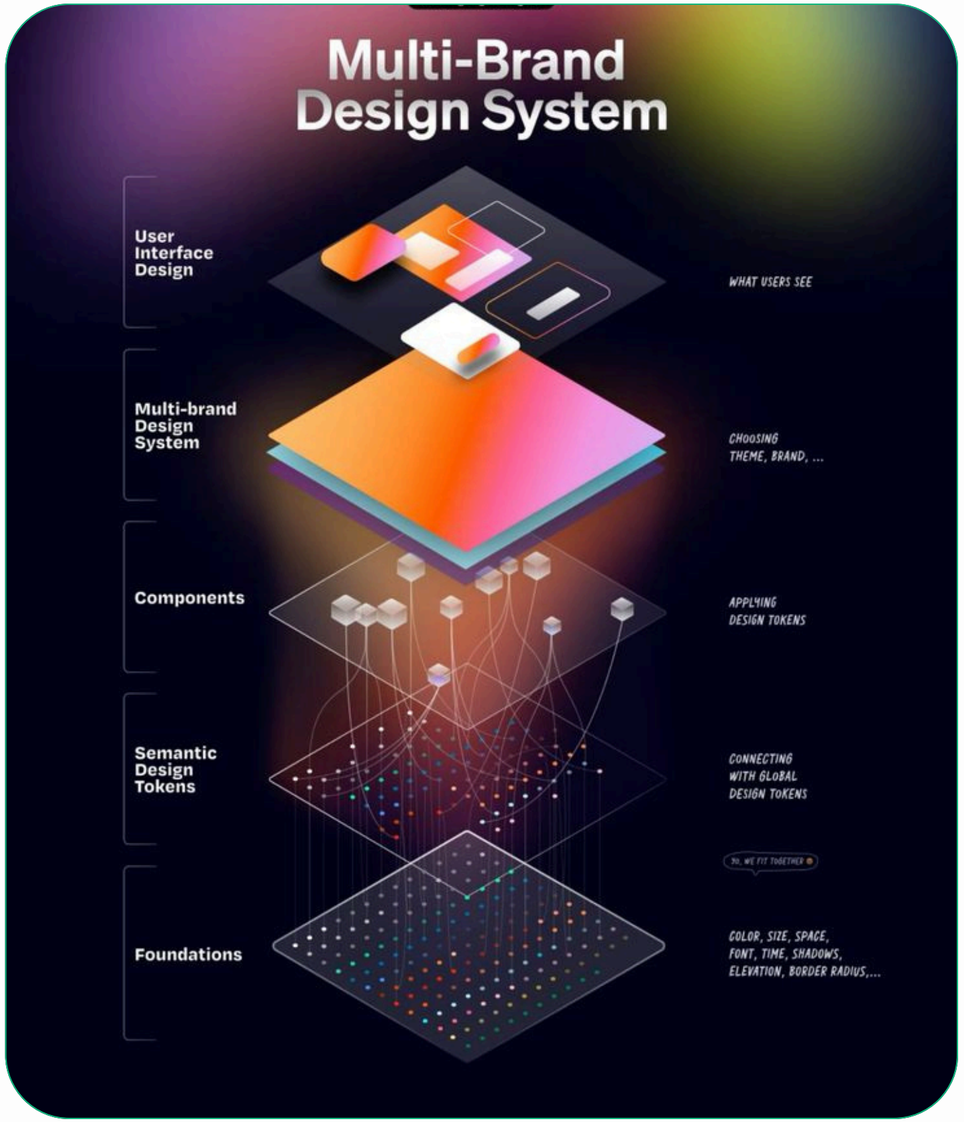

Mapping the key journeys users take through PureBite.

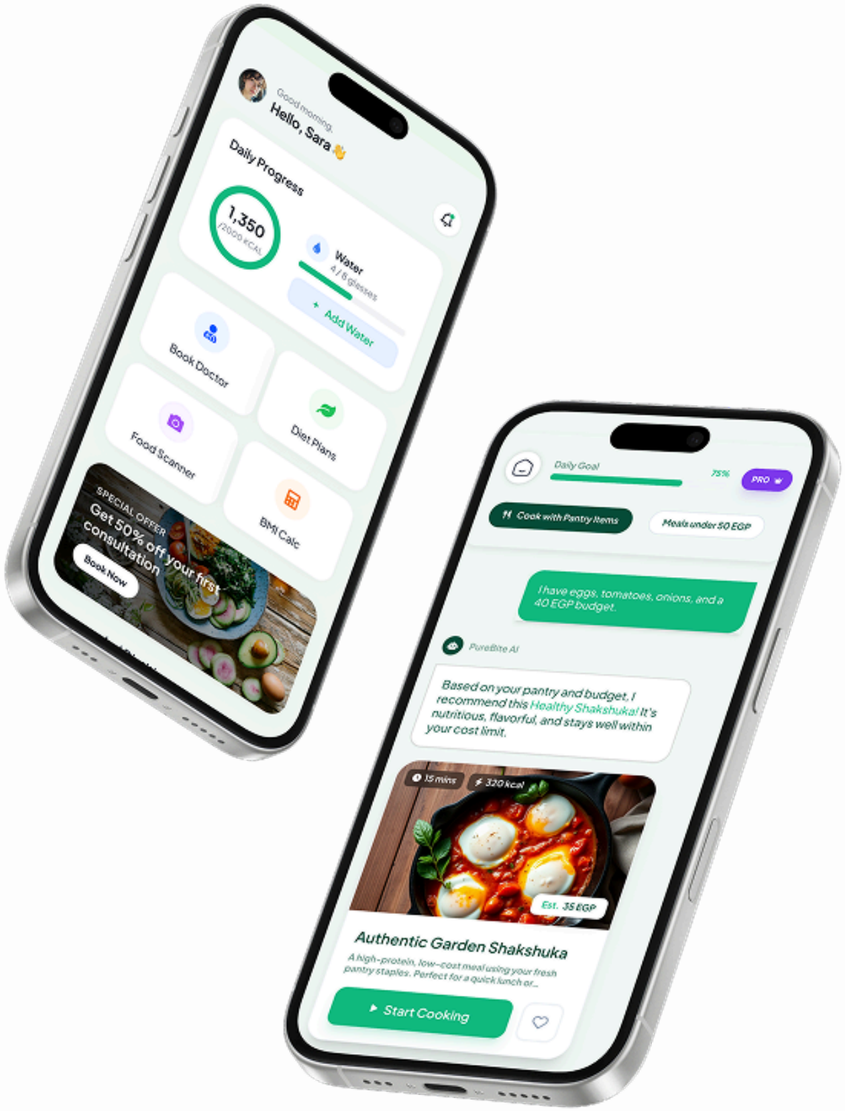

03 — Wireframing

Creating low-fidelity layouts to structure content and interactions.

04 — Prototyping

Building interactive prototypes to validate the user experience before development.

UI/UX Design

Design System & Final UI

Color & Typography

A consistent visual language was created to maintain clarity and brand identity.

Components

Reusable buttons, cards, inputs, navigation elements, and UI components.

Responsive Design

The interface was adapted for both desktop and mobile web experiences.

Accessibility & Usability

Clear hierarchy, readable typography, consistent spacing, and intuitive interactions.

Front-End

Architecture

Component-Based Architecture

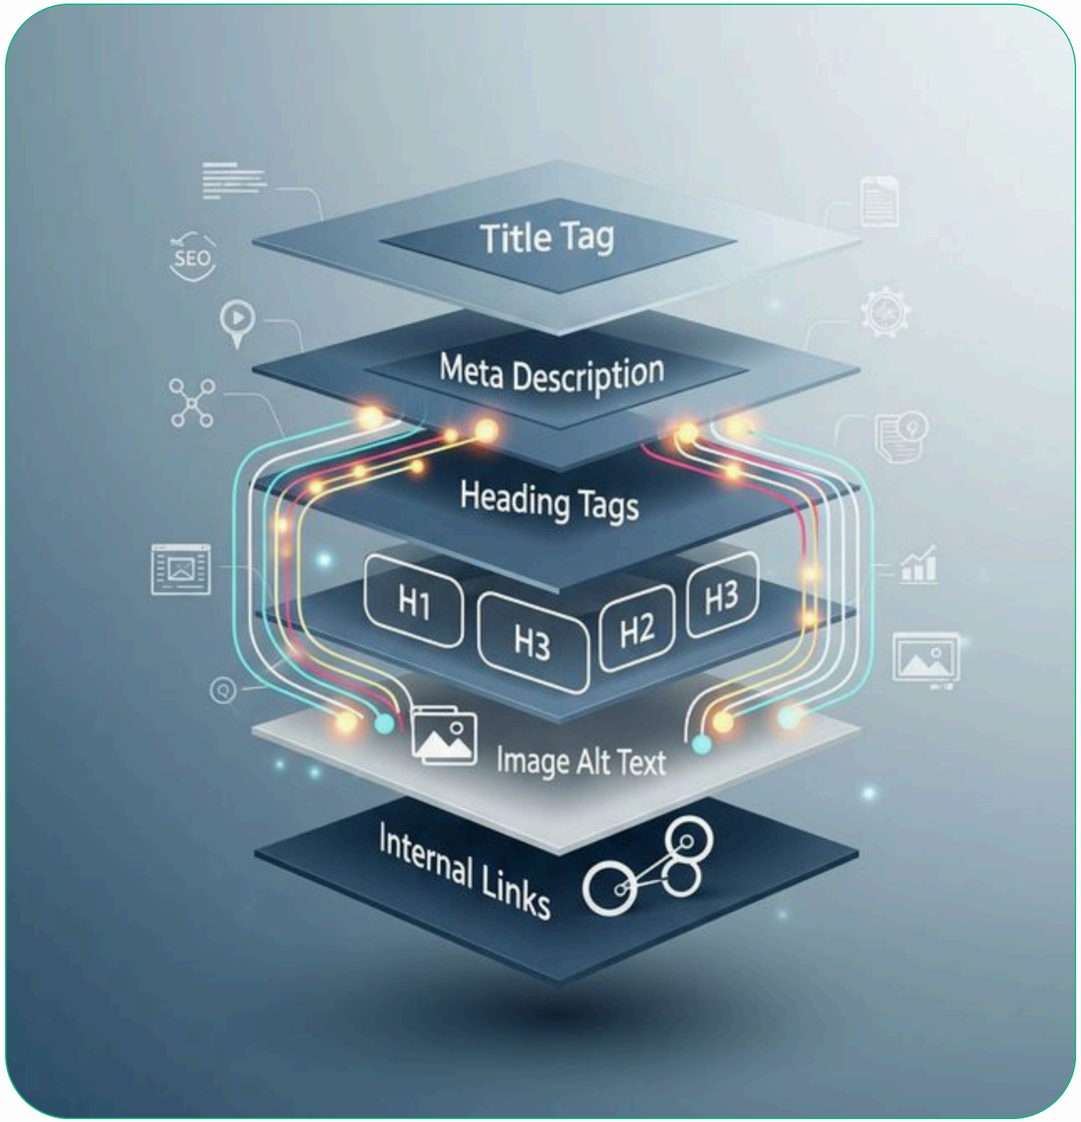

The frontend was built using reusable components to ensure consistency, scalability, and easier maintenance.

Responsive Web Design

The interface adapts seamlessly across desktop and mobile screen sizes.

State Management

Application states are managed to provide smooth interactions and real-time UI updates.

Back-End

Architecture & Technologies

- ASP.NET Core Web API
- Clean Architecture
- ASP.NET Core Identity
- Entity Framework Core
- RESTful APIs
- SQL Server
- Authorization
- Swagger

Back-End

API

Authentication

- Register & Login
- OTP Verification
- Password Reset
- Google Login
- Logout

Doctor

- Retrieve Doctors
- Doctor Management

Tracking

- Meal Tracking
- Water Intake Tracking

Profile & Subscription

- Manage User Profile
- Nutrition Goals
- Subscription Status

Payment

- Create Payment Intent
- Payment Webhook
- Subscription Payment Processing

Recipes & Nutrition

- Browse Recipes
- Categories & Ingredients
- Favorite Recipes
- Daily Meal Metrics

Back-End

Key Back-End Responsibilities

- Authentication & Authorization
- Business Logic
- Data Validation
- Database Operations
- Subscription Management
- Payment Processing
- API Documentation
